Look for warmer than normal high temperatures with thunderstorms possible across west Texas. A few storms could be severe across the Stockton Plateau and Big Bend.

Tonight

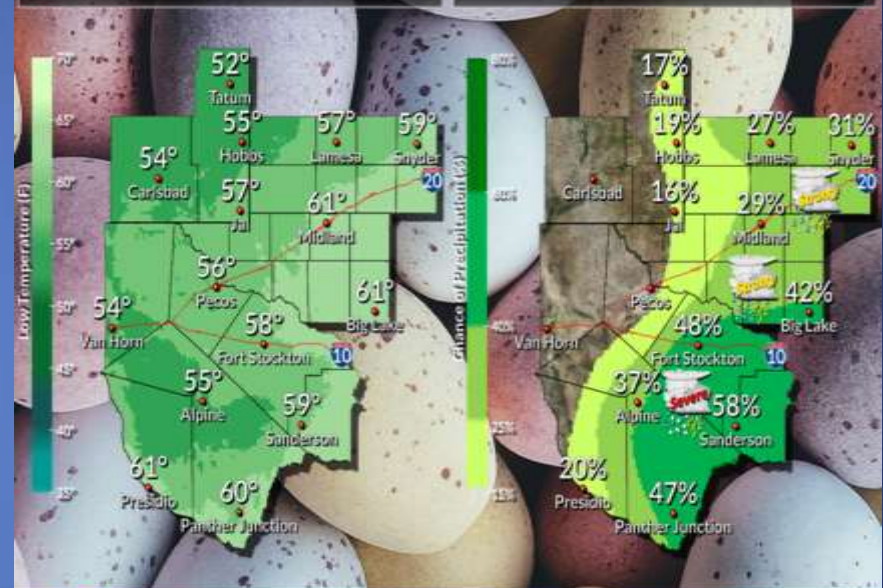

Temperatures will be mild with more storms possible

Weather Forecast Office
Midland/Odessa, TX
Issued April 16, 2017 7:05 AM CT

Above Normal Lows

More Storms

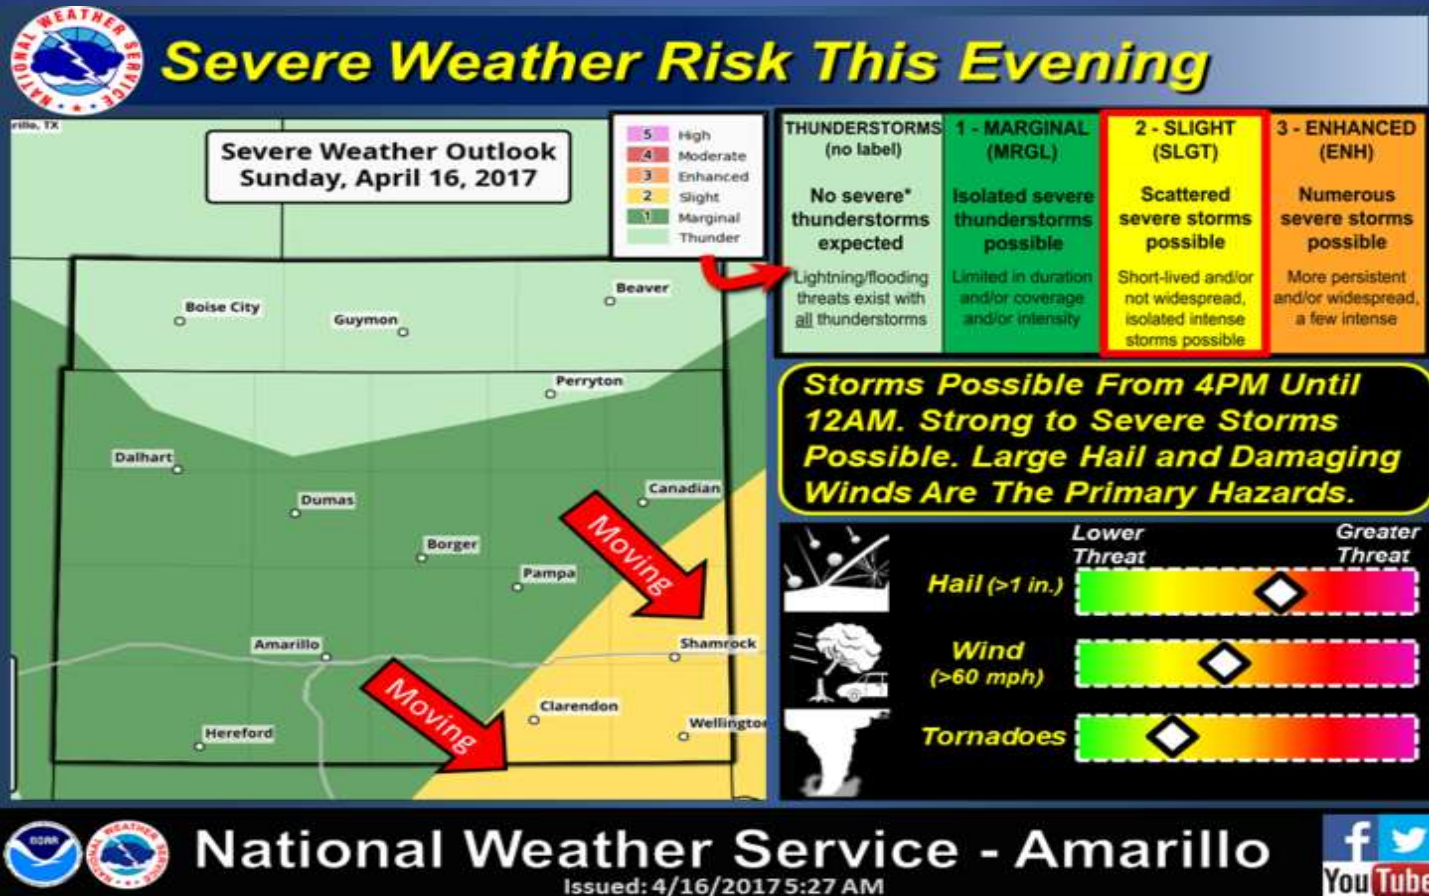

f Twitter YouTube NWSMidland

weather.gov/maf

Strong to severe thunderstorms are possible this afternoon into this evening. Storms are expected to develop to the west and across higher terrain, before moving eastward. The most likely threats with these storms are large hail, damaging winds, and frequent lightning. Be sure to have a plan in place if a warning is issued for your location!

Hazardous Weather

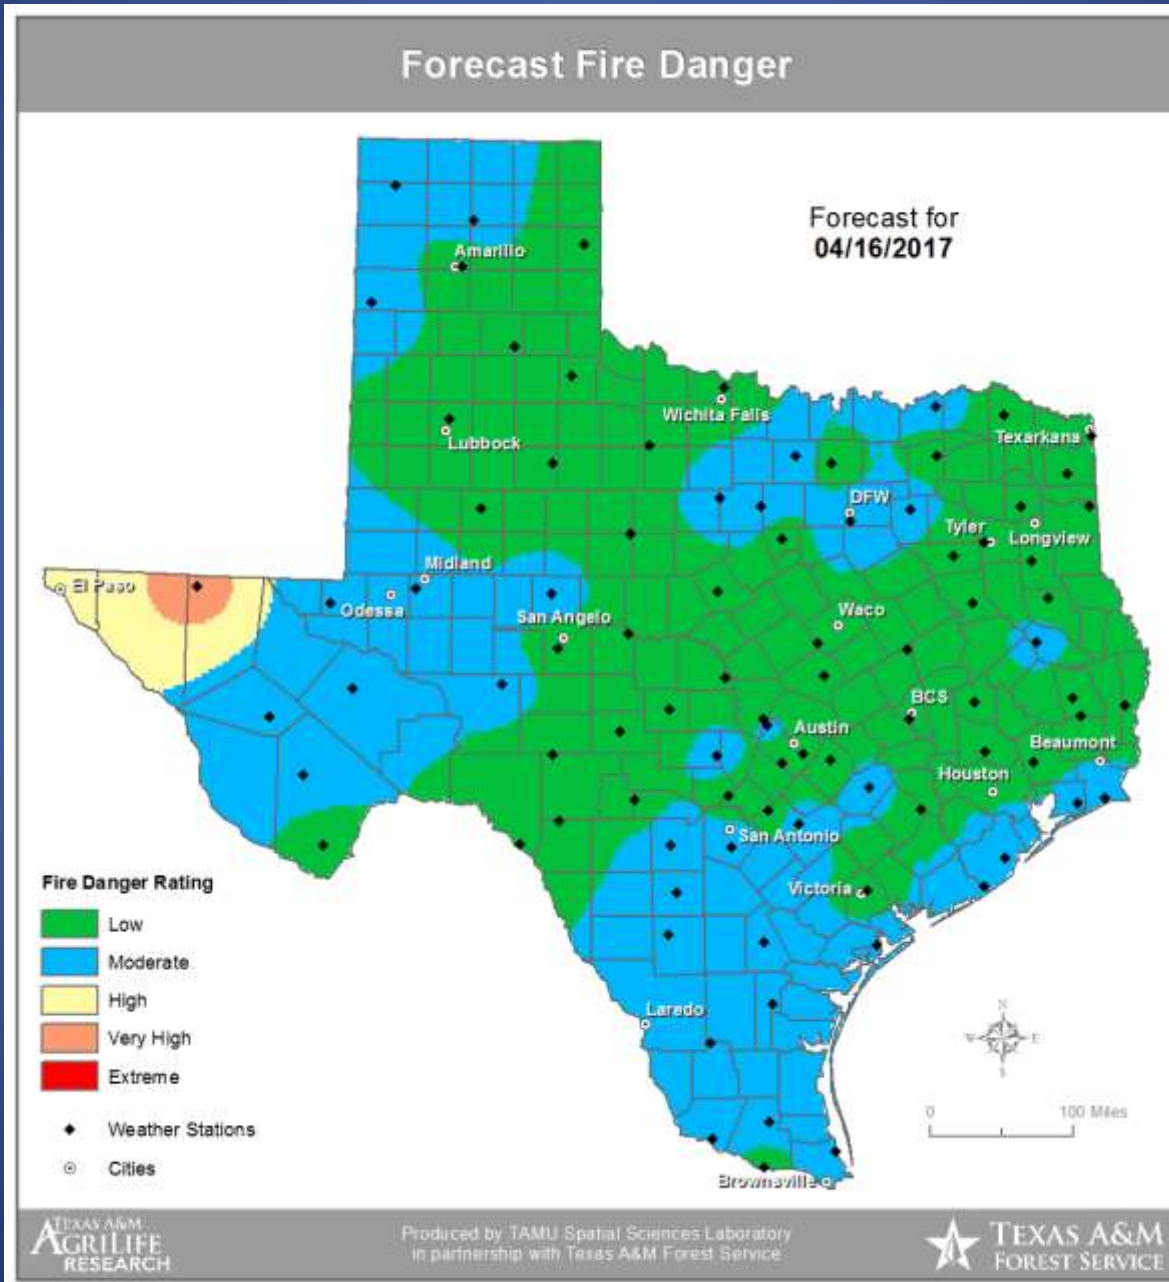

A cold front will slowly make its way through the Panhandles today and is expected to stall along the southern Texas Panhandle this afternoon. Meanwhile, a dryline will be setup across the eastern Texas Panhandle. Showers and thunderstorms are expected to form near the intersection of these boundaries late this afternoon, with the best chance being along and southeast of a line from Clarendon to Wheeler. However, this will largely depend on where the cold front is located by peak heating. Severe thunderstorms will be possible with large hail and damaging winds being the main threat. While a brief tornado cannot be ruled out, conditions are not expected to be favorable for tornado development. Thunderstorm initiation along and west of I-27 will be much more conditional with less low level moisture to work with.

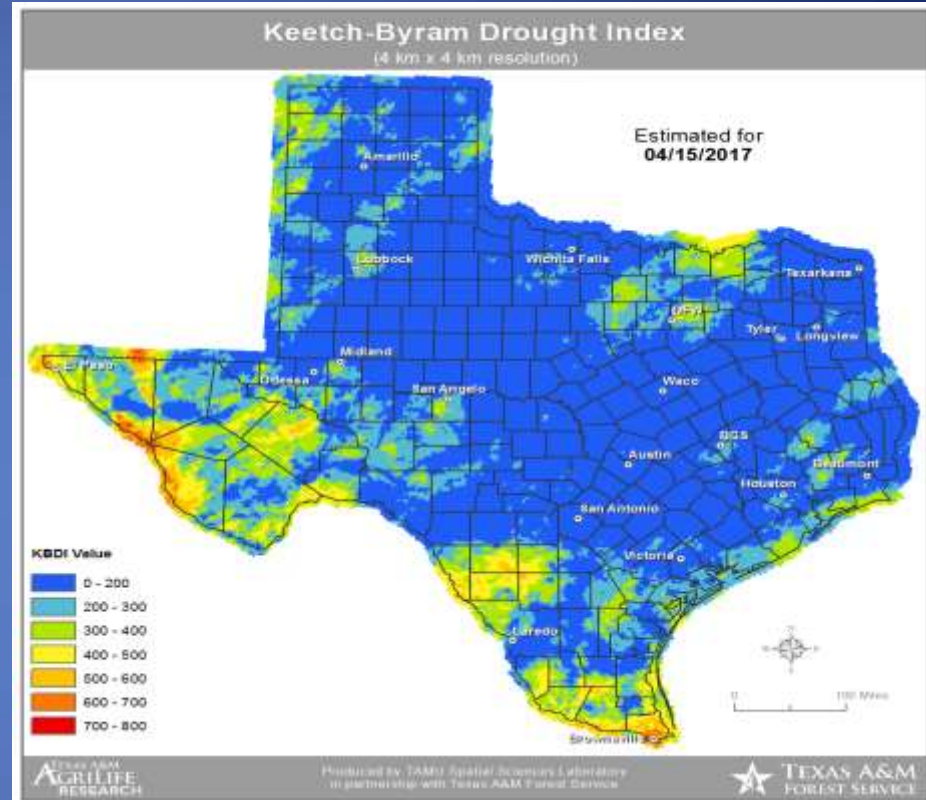

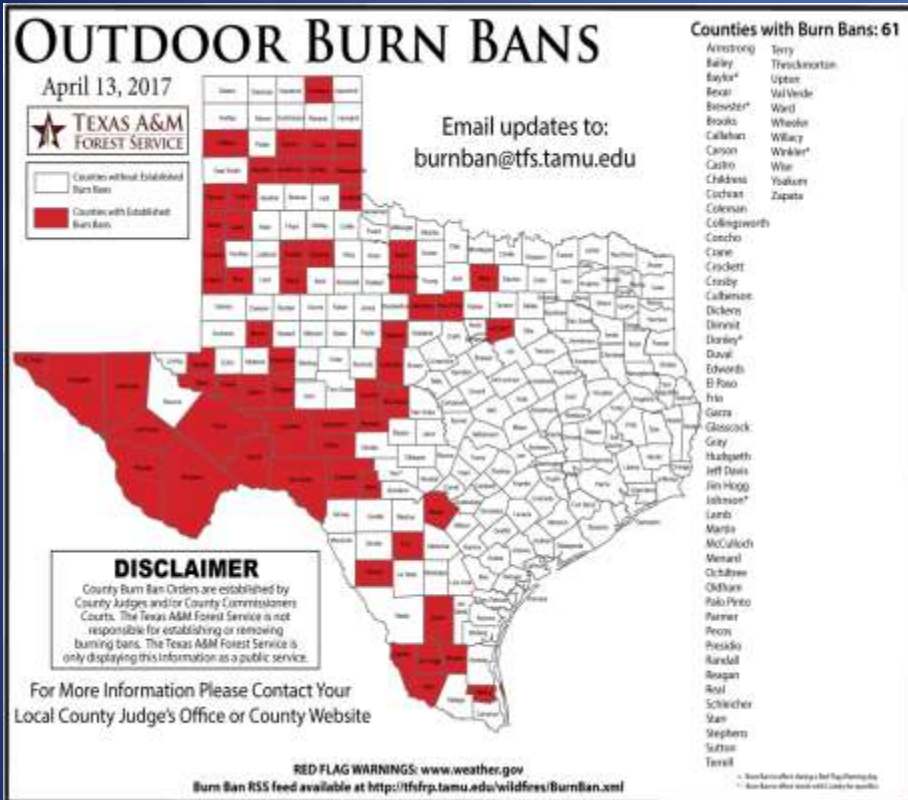

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
04/15/17	Flood Warning Continues	Guadalupe River Near Bloomington affecting Calhoun, Refugio and Victoria Counties, Brazos River in Brazoria County; Navasota River Near Easterly affecting Leon and Robertson Counties; Sulphur River near Naples affecting Bowie, Cass and Morris Counties
